Statutory and Mandatory Training Checks

Introduction

NOA Healthcare believes training is key to professional excellence and that personal development is a continual process which has no end point.

Policy

New members will undergo a comprehensive assessment of both their training achievements and requirements. Members who would have undergone statutory and mandatory training from within the NHS or elsewhere will be required to provide documentary evidence to support the training.

Training undertaken through other bodies will be recognised subject to the approval of the said bodies training credentials.

Training needs are a permanent feature of each member's development and performance review. Expiration and renewal of training is audited, and when required staff members will be prompted to undertake refresher training.

NOA Healthcare is working in partnership with Health and Safety Group and Healthier Business UK for organising all statutory and mandatory training for its members.
